

Errin Ramanujam, Senior Scientist, has been working to provide useful, reliable science to the State of California at Ocean Science Trust since 2011. She leads their work supporting sustainable fisheries as well as collaborating in other program areas including scientific review, climate change, and MPA monitoring. She has over a decade of experience in California Coastal ecosystems and her background includes working in many different sectors including federal government, traditional NGOs, and for-profit companies. Ramanujam earned her MS from the University of Washington School of Aquatic and Fishery Sciences in 2010 and her BA in biology from Earlham College in 2003.
